Comparison Operators

Comparison operators compare two operands and yield an boolean value.

There are the following comparison operators:

== (equal)

!= (not equal)

< (less)

<= (less or equal)

> (greater)

>= (greater or equal)

Logical Operators

Logical operators apply to boolean values and yield a result of the same type as the operands (bool).

There are 3 logical operators in Go:

&& (conditional and)

|| (conditional or)

! (not or logical negation)
